END cels / "A1 END" cels / Tome (□) Cels

An END cel (marked with either END/ E/ or the kanji □) is the last cel in an animation sequence. A1END cel setups are sometimes referred to as Tome/□ cels. When a cel is marked with a letter A/B/C/E..+ 1 + END/E/□ then that means it is the only cel for that particular animation sequence. So an A1END cel setup starts and ends with only that frame. Since there is only a single frame in this type of setup it will generally bring up the value of a cel/setup depending on the quality of the image. In the case of a multiple cel setup, a B1End/□ will increase the value of the setup, because any other setups with the A2 or C3 for example will always be missing that B1End/E.

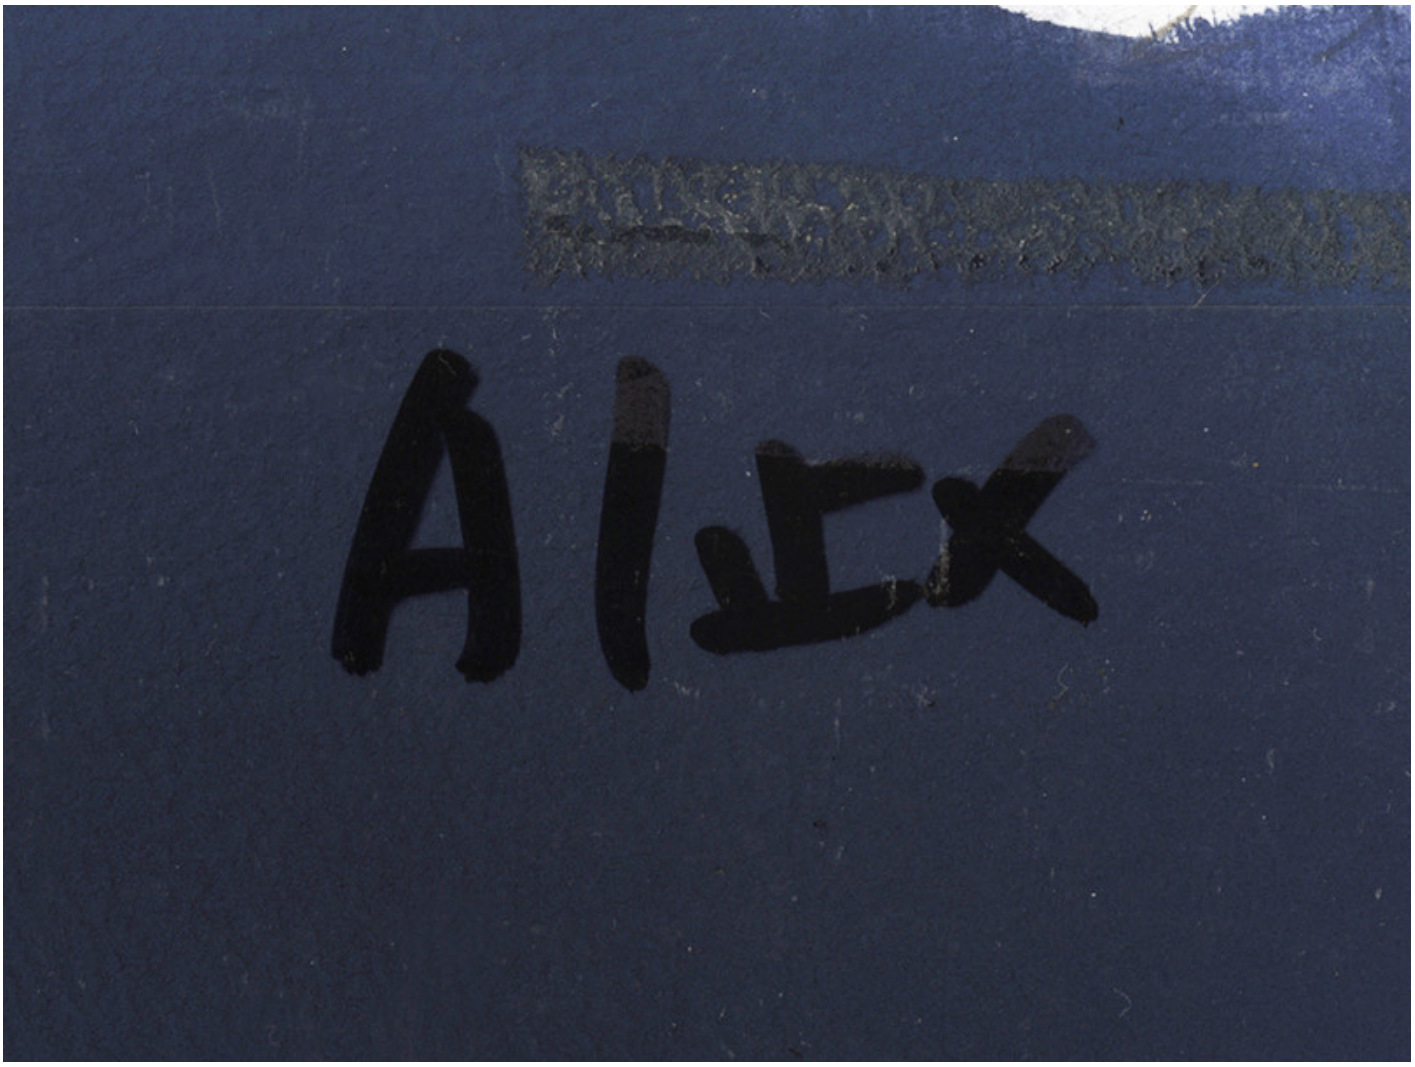

Below are examples of how an A1 end cel can be labeled

1st is "END"

2nd is "E" with a circle around it

3rd has the kanji "□ "
